Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a system for measuring aviation risks for improved aircraft safety and more particularly, but not by way of limitation, to an aircraft flight measuring system for providing a flight planning aid to a pilot the new aircraft flight measuring system calculates various risk factors and provides a summary report. Each independent claim identifies the uniquely distinct features "the risk measuring system provides flight planning based on accident history reports, airspace data with respect to routes, destination, elevation and geographic, and live weather forecasts data related to the aircraft's flight" to provide the pilot with a decision whether to fly, not to fly or to change the flight path. The closest prior art, Durlacher et al. (US 6,633,801) and Sainthuille et al. (US 6,546,338) disclose conventional flight information display and collision avoidance system, either singularly or in combination, fail to anticipate the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art of Hensey et al. (US 6,816,762), Jiang (US

6,278,913), Provan et al. (US 6,208,955), Kiperztok et al. (US 6,751,536), Thompson (US 6,529,620), and Nguyen et al. (US 6,003,808) are cited to show a variety of aircraft measuring and monitoring systems.
